

Mandate Guard — Evidence Packet

Authorization record for an autonomous agent purchase · packet v1.0

Purchase completed and confirmed by the card network.

1. Summary

Outcome	SUCCESS
Request	Buy a bag of house blend and two boxes of filters from Beanline, under \$30.
Cardholder	shivanshamba@mhub.org
Merchant	Beanline Coffee
Amount	27.00 USD
Order number	BL-DFBD782B
Mandate hash	8d1d37bce372d8f7ae74d7436ee5e46e310fb4d1db61bba3f69243afdb7193b7
Ledger events	11
Chain verified	VERIFIED

2. Mandate — what the user authorized

Cardholder authorization scope (mapped to the evidence categories issuers evaluate under frameworks like Visa CE 3.0)

Mandate ID	f3f9cdc6-a74e-4ab9-a0ed-70ceb50af6f4		
Status	confirmed		
Confirmed at	2026-08-01T19:03:16.762090Z		
Created at	2026-08-01T19:03:16.762090Z		
Valid for	15 minutes from creation		
Merchant	Beanline Coffee — https://beanline.example.com		
Spend ceiling	30.00 USD		
Substitutions	none		
Product	Description	Max unit price	Qty
BL-HOUSE-12	Beanline House Blend 12oz	14.00	1
BL-FILTER-100	Paper Filters 100ct	8.00	2

3. Agent proposal — what the agent wanted to buy

Transaction as proposed by the agent

Product	Description	Unit price	Qty
BL-HOUSE-12	Beanline House Blend 12oz	12.50	1
BL-FILTER-100	Paper Filters 100ct	7.25	2
Proposed total		27.00	
Agent model		gpt-5-mini	
Agent rationale		The agent selected Beanline House Blend 12oz (x1) and Paper Filters 100ct (x2) because the user requested one bag of house blend and two boxes of filters from Beanline. The data shows prices of \$12.50 for the coffee and \$7.25 per filter box, totaling \$27.00, with no items marked unavailable.	

4. Verification gate — was the agent allowed to buy this?

Pre-authorization verification result

AI-GENERATED

Narrative (AI-generated summary of the deterministic record below)

Record shows a completed purchase: buy a bag of house blend and two boxes of filters from Beanline Coffee for under \$30 (USD). Order number: BL-DFBD782B.

Authorization and screening details: gateway verdict = PASS; Visa confirmation = SUCCESS; no failed rules listed; chain_valid = true.

Additional metadata: outcome = COMPLETED; event_count = 11.

Credential handling: full payment tokens and dynamic CVVs are held in memory only and never persisted, logged, or included in this packet. This record stores the token's last four digits, its expiry, and the transaction reference only.
